## **NEPGA ANNOUNCES DAN DOLAN AS PRESIDENT**

BOSTON, MA – The Board of Directors of the New England Power Generators Association (NEPGA) today announced the appointment of Dan Dolan as President of the organization. Dolan comes from the national association of competitive power suppliers, the Electric Power Supply Association (EPSA), where he departs as Vice President of Policy Research & Communications.

“Dan Dolan brings to NEPGA a broad background on markets, advocacy and trade association leadership that will best position this organization to address the critical challenges that face New England’s electric generators,” said NEPGA Chairman Chris Sherman. Sherman added, “His talents and expertise will be a tremendous benefit to the region’s electricity policy development and NEPGA.”

At EPSA Dolan has been responsible for coordinating the association’s state regulatory and legislative initiatives as well as overseeing the development of financial reform policies. He has also served as a primary liaison with the media and at a variety of academic, industry and policymaker venues.

“I’m excited to help lead NEPGA in its mission to support the investment in and operation of electric generators to reliably and efficiently serve consumers. New England has been a leader in the adoption of competitive electricity markets recognizing the numerous benefits competition provides. I look forward to working with policymakers and stakeholders on continuing to develop well-functioning markets to meet New England’s power needs today and for years to come,” Dolan said.

EPSA President & CEO John E. Shelk commented, “Dan has been a tremendous asset at EPSA and has led EPSA’s engagement in a number of key areas. While I am sad to see him leave, I look forward to continuing to work with him to improve competitive power markets.”

Born and raised in Massachusetts, Dolan is a graduate of Goucher College. He will begin at NEPGA in late October.

###

*NEPGA is the largest trade association representing competitive electric generating companies in New England. NEPGA’s member companies represent approximately 27,000 megawatts of generating capacity in the region. NEPGA’s mission is to promote sound energy policies which will further economic development, jobs, and balanced environmental policy. We believe that sustainable competitive markets are the best means to provide long-term reliable and affordable supplies of electricity for consumers. ([www.NEPGA.org](http://www.NEPGA.org))*
